

Gabriel A. Terejanu

terejanu@cec.sc.edu

<http://www.UncertaintyQuantification.org>

Phone: (803) 777-5872

Department of Computer Science and Engineering

College of Engineering and Computing

University of South Carolina

Storey Innovation Center, 550 Assembly Street, Columbia, SC 29208

Research Interests

Uncertainty Quantification
Machine Learning

Bayesian Inference
Information Theory

Model Calibration and Validation
Optimal Experimental Design

Education

Ph.D. in Computer Science and Engineering

University at Buffalo, State University of New York

Jun 2010

M.S. in Computer Science and Engineering

University at Buffalo, State University of New York

Sep 2007

Eng.Diploma (B.Eng./M.Eng.) in Robotics

University of Craiova, Romania

Jun 2004

Professional Experience

Assistant Professor, University of South Carolina
Department of Computer Science and Engineering

Jun 2012 - present

Postdoctoral Fellow, University of Texas at Austin
Institute for Computational Engineering and Sciences (ICES)

May 2010 - May 2012

Research Assistant, University at Buffalo, New York
Department of Computer Science and Engineering

Jan 2006 - Apr 2010

Quantitative Research Analyst, Maple Securities USA, Buffalo, New York
Statistical Arbitrage Trading Group

May 2008 - May 2009

Teaching Assistant, Auburn University, Alabama
Department of Mechanical Engineering

May 2005 - Dec 2005

Research Assistant, University of Craiova, Romania
Department of Mechatronics and Robotics

Jun 2004 - Apr 2005

Selected Awards & Honors

2017 Breakthrough Star Award, University of South Carolina

Valedictorian, University of Craiova, Romania, June 2004

Best Paper Award at WCECS'11 International Conference on Modeling, Simulation and Control, San Francisco, October 2011, "Application of Predictive Model Selection to Coupled Models".

Best Student Paper Award at WCECS'11 International Conference on Modeling, Simulation and Control, San Francisco, October 2011 for the paper "Optimal Data Split Methodology for Model Validation".

Best Student Paper Travel Award at the 12th International Conference on Information Fusion, Seattle,

Washington, July 2009, “Decision Based Uncertainty Propagation Using Adaptive Gaussian Mixtures”.

Travel Awards for participating at the following workshops and conferences:

- (1) The Chemical and Biological Defense Physical Science and Technology Conference, New Orleans, Louisiana, November 2008
- (2) The Chemical and Biological Defense Physical Science and Technology Conference, Dallas, Texas, November 2009
- (3) IMA Hot Topics Workshop: Uncertainty Quantification in Industrial and Energy Applications: Experiences and Challenges, University of Minnesota, Minneapolis, Minnesota, June 2-4, 2011
- (4) SAMSI/Sandia Summer School on Uncertainty Quantification, Albuquerque, New Mexico, June 20-24, 2011
- (5) ICiS Workshop on Verification, Validation and Uncertainty Quantification Across Disciplines Park City, Utah, August 6-13, 2011
- (6) SAMSI Uncertainty Quantification: Engineering and Renewable Energy Opening Workshop, Research Triangle Park, NC, September 19-21, 2011
- (7) SIAM Conference on Uncertainty Quantification, Raleigh, NC, April 2-5, 2012
- (8) SAMSI/ORNL Uncertainty Quantification in High Performance Computing Workshop, Oak Ridge, TN, May 2-4, 2012

First Prize Nationally Awarded by the Romanian Society of Automation and Technical Informatics (SRAIT), Romania, June 2004 for the undergraduate thesis “Software Architecture for Remote Monitoring and Controlling of Mechatronic Systems”

Research Grants

PI: TOXIMAP: Computational Framework for Prediction of Geographical and Temporal Incidence of Mycotoxins in US Crop Fields, USDA-NIFA, \$500,000, 02/2017 - 02/2020, PI: Gabriel Terejanu, Co-PIs: Sourav Banerjee, Anindya Chanda.

Co-PI: South Carolina Center for Cybersecurity Innovation (SC3I), SC Dept. of Commerce, \$248,907, 03/2017 - 09/2018, PI: Csilla Farkas, Co-PI: Gregory Gay, Gabriel Terejanu, Neset Hikmet, Benjamin Schooley, joint with Fraunhofer Institute

Co-PI/advisor: MAGELLAN: Noemi Glaeser: Generating Geographic and Temporal Heat Maps of Aflatoxin Incidence using Regularized Linear Models, Office of Undergraduate Research, University of South Carolina, \$2,500, 2017, PI: Noemi Glaeser, Co-PI/advisor: Gabriel Terejanu

Co-PI/advisor: MAGELLAN: Jonathan Senn: Validating in Vitro Models for Aflatoxin Production in Maize using a New Open Field Sample Database, Office of Undergraduate Research, University of South Carolina, \$2,500, 2017, PI: Jonathan Senn, Co-PI/advisor: Gabriel Terejanu

Co-PI: RII Track-2 FEC: Center for a Sustainable Water, Energy, and Food Nexus (SusWEF), NSF, \$2,000,000, 08/15/2016 - 08/14/2020, PI: Nelson Cardona-Martinez, Co-PIs: Juan Lopez-Garriga, Maria Curet-Arana, Andreas Heyden, Gabriel Terejanu

PI: SciLAF: Scientific-based Learning Assessment Framework for Student Knowledge Tracking, NSF-IUSE, \$250,000, 08/2015 - 08/2017, PI: Gabriel Terejanu, Co-PIs: Juan Caicedo, Charles Pierce.

PI: Demonstration of Model using Cover Crops to Improve Soil Health and Reduce Crop Stress and Aflatoxin Contamination, USDA-NRCS, \$75,000, 01/2016 - 12/2018, PI: Gabriel Terejanu, Co-PIs: Sourav Banerjee, Anindya Chanda, Buz Kloot.

Co-PI: DMREF: Collaborative Research: Design and Discovery of Multimetallic Heterogeneous Catalysts for a Future Biorefining Industry, NSF-DMREF, \$840,000, 09/2015 - 09/2019, PI: Andreas Heyden, Co-PIs:

Gabriel Terejanu (share \$270,000), Ammal Salai.

Co-PI/advisor: SPARC: Xiao Lin: Computational Tool for Identifying Branching Types in Hyphal Growth Models, Office of the Vice President for Research, University of South Carolina, \$5,000, 2016, PI: Xiao Lin, Co-PI/advisor: Gabriel Terejanu

PI: ASPIRE II: Uncertainty Quantification driven Multi-scale Model Development for Aflatoxin Prediction, Office of the Vice President for Research, University of South Carolina, \$100,000, 05/2014 - 08/2015, PI: Gabriel Terejanu, Co-PIs: Sourav Banerjee, Anindya Chanda.

Co-PI: ASPIRE III: A Platform for Basic and Applied Research in Personal Robotics, Office of the Vice President for Research, University of South Carolina, \$50,000, PI: Jason M. OKane, Co-PIs: Jenay M. Beer, Gabriel Terejanu, Michael Huhns.

Selected Professional Services

Reviewer: Computers and Geosciences, Computers and Geosciences, Information Fusion, Scientific Reports, Journal of Computers & Mathematics with Applications, SIAM Journal on Scientific Computing, Journal of Uncertainty Quantification, Computer Methods in Applied Mechanics and Engineering, Environmental Modeling & Software, Journal of Applied Stochastic Models in Business and Industry, IEEE Signal Processing Letters, Reliable Computing, Entropy, Elsevier Journal of Signal Processing, IEEE Transaction on Automatic Control, American Control Conference (2010, 2011, 2012), IEEE Conference on Decision and Control 2012, International Conference on Information Fusion 2012, IEEE 9th Sensor Array and Multichannel Signal Processing Workshop (SAM 2016)

Minisymposia Co-organizer: SIAM Conference on Uncertainty Quantification: 2016 (Lausanne, Switzerland) “Data Assimilation Techniques for High Dimensional and Nonlinear Problems” - 8 talks, 2014 (Savannah, Georgia) “Advances in Optimal Experimental Design” - 14 talks, 2012 (Raleigh, North Carolina) “From Model Calibration and Validation to Reliable Extrapolations” - 12 talks and “UQ for Model Calibration, Validation and Predictions” - 8 talks.

Assistant Editor for the Journal of Complex Adaptive Systems Modeling.

Review Panels: NSF-DMREF, NSF-IUSE, DOE-CSGB, USC-VPR ASPIRE II & SPARC

Research Supervision (Students and Postdocs)

Xiao Lin, PhD defense February 2018, “Inference Framework for Model Update and Development” (USC SPARC awardee)

Eric Walker, PhD defended August 2016, “Bayesian Method for Identifying the Mechanism of Water-Gas Shift Reaction on Noble Metal Catalysts”

Kareem Ezz El-Deen, PhD expected May 2018, “High-dimensional Bayesian Inverse Problems”

Asif Chowdhury, PhD expected May 2018, “Bayesian Inference for Stacked Gaussian processes”

Chao Chen, PhD expected May 2018, “Spatial-Temporal Modeling of News Diffusion in Social Networks”

Sourav Das, MS defended November 2016, “Blind Change Point Detection and Regime Segmentation using Gaussian Processes Regression” (Lead Data Scientist at Target)

Jiting Xu, MS defended July 2014, “Approximate Bayesian Computation based on Progressive Selection of Gaussian Components” (Senior Data Scientist at eBay)

Xiaofan Wang, visiting scholar November 2012 - November 2013, Department of Computer Science, Xian University of Technology, Shaanxi Province, PR China, “Optimal Sensor Placement for Monitoring Chemical Release Incidents”

Noemi Glaeser, BSc expected May 2017, “Generating Geographic and Temporal Heat Maps of Aflatoxin Incidence using Regularized Linear Models” (USC MAGELLAN awardee)

Jonathan Senn, BSc expected May 2017, “Validating in Vitro Models for Aflatoxin Production in Maize using a New Open Field Sample Database” (USC MAGELLAN awardee)

Service

Qualifying Exam Committee Chair (2018 - present) at University of South Carolina

Program Director of Minor in Data Science (2017 - present)

Graduate Studies Committee Member (2012 - present)

Search Committee Member at University of South Carolina

PhD Committee member, Leydy (Civil Engineering), “Construction of a Probabilistic Multidimensional Constitutive Model (PMCM) of the Compressive Strength of Hardened Cement Paste (HCP) reinforced with MWCNTs”, proposal: December 2017

PhD Committee member, Beidi Qiang (Statistics), “Improved Simultaneous Estimation of Location and System Reliability Via Shrinkage Ideas”, proposal: October 2016, defense: May 2017

MS Committee member, Lacie Cochran (Computer Science and Engineering), “Hardware Accelerated Spiking Neural Network”, proposal: August 2017

PhD Committee member, Wenqiang Yang (Chemical Engineering), “Rational Design of Heterogeneous Catalysts for Hydrodeoxygenation of Succinic Acid”, proposal: May 2017

PhD Committee member, Yan Zhang (Computer Science and Engineering), “Deep Learning in Computational Biology”, proposal: April 2017, defense: November 2017

External evaluation member - qualifying exam, Christopher Edgar (Mathematics), August 2016

External evaluation member - qualifying exam, Sajan Shrestha (Mechanical Engineering), Nov 2015

PhD Committee member, Albert Ortiz Lasprilla (Civil and Environmental Engineering), “Modeling Human-Structure Interaction using a Controller System”, proposal: November 2015, defense: March 2016.

PhD Committee member, Zizhen Wu (Statistics), “Methods for Registration and Clustering of Functional Observations”, proposal: October 2015, defense: May 2016.

PhD Committee member, Mohammad Saleheen (Chemical Engineering), “Developing an Artificial Neural Network (ANN) Potential for Describing Metal- Water Interactions Applications of Machine Learning Techniques”, proposal: September 2015

PhD Committee member, Ramin Madarshahian (Civil and Environmental Engineering), “Reducing Computational Cost in Bayesian Model Updating Using a Two Layered Approach”, proposal: February 2015, defense: July, 2017

PhD Committee member, Arjang Fahim (Computer Science and Engineering), “nD-PDPA: n-Dimensional Probability Density Profile Analysis”, proposal: October 2014, defense: November 2015

PhD Committee member, Osman Mamun (Chemical Engineering), “Rational Design of Bifunctional Catalysts for the Conversion of Levulinic Acid to γ -Valerolactone”, proposal: September 2014, defense: July, 2017

MS Committee member, Ahmed AL-Qurri (Computer Science and Engineering), “Incorporating Amino Acid Bonds to Improve Peptides Identification Accuracy”, proposal: September 2016, defense: April 2017

MS Committee member, Ahmed AL-Qurri (Computer Science and Engineering), “Incorporating Amino Acid Bonds to Improve Peptides Identification Accuracy”, proposal: September 2016, defense: April 2017

MS Committee member, Chandrahas Gurram Venkat (Computer Science and Engineering), “Hidden Markov Model for State Estimation using Underground Sensor Data”, proposal: September 2016, defense: November 2016

MS Committee member, Eric Walker (Chemical Engineering), “Comparison of a Particle Filter and other State Estimation Methods for Prognostics of Lithium-ion Batteries”, August 2013

Judge at Dutch Fork High School Research Symposium, October 2016

Student Representative in the Computer Science Graduate Studies Committee, Sep 2007 - May 2008

Vice-President & IT Coordinator, European Student Association AEGEE Craiova, Jan 2000 - Oct 2003

Teaching

CSCE 582 Bayesian Networks and Decision Graphs (undergraduate/graduate) (Spring 2018)

CSCE 590/576 Data Visualization (undergraduate/graduate) (Spring 2016, Spring 2017)

CSCE 883 Machine Learning (graduate) (Fall 2014, Fall 2015, Fall 2016)

CSCE 758 Probabilistic System Analysis (graduate) (Fall 2012, Fall 2013)

CSCE 350 Data Structures and Algorithms (undergraduate), (Spring 2013, Spring 2015, Fall 2017)

CSCE 791 Seminar Advances in Computing (graduate), (Fall 2015, Fall 2016)

Software Skills

Skills: Python, C++, MPI, SQL, Linux, LaTeX, Git

GitHub: <https://bitbucket.org/uqlab>

Software (releases & contributions)

1. Contribution to **QUESO** (Quantification of Uncertainty for Estimation, Simulation, Optimization) added information-theoretic estimators to be used in model validation and calibration projects (<https://github.com/libqueso/queso>).
2. **Predictive Selection of Coupled Models** C++ application framework developed on top of QUESO for solving the problem of predictive model selection of coupled models (<https://bitbucket.org/uqlab/predictiveselectioncoupleddmodels>).
3. **Adaptive Gaussian Sum Filter**. Matlab code for adapting the weights of a Gaussian sum in the context of nonlinear filtering (<https://bitbucket.org/uqlab/adaptivegaussiansumfilter>).
4. **SciLAF** Learning Assessment Framework. Scientific based Learning Assessment Framework for student knowledge tracking. The main functionalities of this framework are to construct Bayesian student models, optimize the models, and generate individualized student models for student knowledge estimation, student misconception identification, and evaluation of questions design (<https://bitbucket.org/uqlab/scilaf>).
5. **StackedGP**. Python library that implements the StackedGP modeling framework. The main applications for StackedGP framework are to integrate different datasets through model composition, enhance predictions of quantities of interest through a cascade of intermediate predictions, and to propagate uncertainties through emulated dynamical systems driven by uncertain forcing variables, (<https://bitbucket.org/uqlab/stackedgp>).
